

Reliable support services mean you're never on your own.

We don't just sell lubricants; we aim to provide you with the optimum lubrication solution, whatever your particular process.

We not only assist you in selecting the right fluids and greases for your application but also can provide you with a wide variety of engineering services that help reduce costs and improve productivity through better lubrication management.

-  **ExxonMobil Technical Support** — Convenient assistance from our team of technical experts, available by phone or online, providing guidance and advice for your facility.
-  **Dedicated Sales Representatives** — On-site guidance from oil and gas sales specialists to help enhance your plant's productivity.
-  **Field Engineering Services (FES)** — Expert application advice on lubrication practices, optimizing lubricant performance, and equipment troubleshooting, plus systems inspections and proactive monitoring to help you run your machines longer and more efficiently.
-  **State-of-the-art Signum Oil Analysis program** — Monitors lubricant and equipment condition to help increase equipment life and reliability, and reduce maintenance costs. Specifically tailored for the oil and gas exploration and production industry to gauge critical indicators in used oil, the program delivers the knowledge you need to better understand your company's lubricants and equipment status.

Partners in productivity.

So count on the technology leadership and application expertise behind Mobil Industrial Lubricants to help your machinery produce more, better, faster, with more uptime and greater efficiency. Discover how we can help you drill productivity into your oil and gas exploration and production — and help your business soar.

Mobil Industrial
Lubricants

Solutions and services for oil and gas exploration and production Productivity from the ground up

ExxonMobil

Minimize unplanned downtime. Reduce operating costs. Lower environmental impact.

With the help of Mobil Industrial Lubricants.

In an industry where machine reliability is crucial, our lubricants help ensure your equipment operates longer and trouble-free, and your business runs without interruption.

Whether your oil or gas exploration and production takes you offshore or onshore, one thing is certain: The last thing you want is unplanned downtime. Because if your machinery stops pumping, so do your profits. How can you ensure your operation keeps going as efficiently as possible? Start with one of the best, most reliable, high-performance lubricants on the market. Get the support of expert technical professionals. Partner with a company that has a profound understanding of your business. And secure a reliable supply source — even at the most remote locations.

There's one way you can get all that. By using Mobil Industrial Lubricants. Mobil Industrial Lubricants help enable a level of productivity from your equipment — from fields to platforms — that you've never had before. All while helping you reduce your used-oil generation. Making your operation not just run, but fly.

Productivity that's proven — engineered to help deliver for the energy exploration and production industry.

For nearly 50 years, we have been a leader in developing synthetic-performance lubricants — offering innovations beyond the capabilities of conventional mineral oils. When conditions are severe, Mobil SHC lubricants — formulated with tailored properties — provide distinct advantages, helping extend the service life of machine components and reducing oil changes, as well as potentially reducing or eliminating equipment failure and unscheduled shutdowns. Plus, in most operating conditions, Mobil SHC offers extended drain intervals over mineral oils for added peace of mind.

Our comprehensive line of synthetic and premium mineral oil-based lubricants for oil and gas exploration and production machinery, including hydraulic, compressor, and gear oils, have all been designed for the diverse range of operating environments found in the industry. The exceptional product offering includes*

- **Mobil SHC Pegasus** energy-efficient gas engine oil
- **Mobil SHC 600 Series** supreme-performance circulating and gear oils
- **Mobilith SHC Series** synthetic greases for demanding and high-temperature applications
- **Mobil SHC Polyrex Series** synthetic grease for extreme-temperature applications
- **Mobil SHC Gear** supreme-performance gear and bearing oils
- **Mobil Rarus SHC 1020 Series** synthetic oils for booster pumps and air compressors
- **Mobil EAL Environsyn** biodegradable hydraulic fluids
- **Mobil DTE 800 Series** high-performance oils for gas, steam, and combined-cycle gas turbines
- **Mobil Pegasus 1005** high-performance oils for natural gas engines
- **Mobil DTE 10 Excel Series** energy-efficient, high-viscosity-index, shear-stable, antiwear oils for hydraulic systems
- **Mobilgard** diesel engine oils for cylinders, pistons, and bearings in marine and industrial diesel engines
- **Mobil Delvac** high-performance diesel engine oil for severe on- and off-highway applications

What's more, the ability to obtain all the various lubricants you need from one source allows your business to be more cost-effective; and the reliable global supply capability for which we are valued means you need carry only a minimum of inventory onboard.

*Since equipment and operating conditions vary, please refer to equipment builder manual for preferred lubrication recommendations.

Backed by unsurpassed industry expertise.

For over 100 years, we have led the industry in developing lubricants that are dependable, durable, and provide exceptional protection. Our global network of highly experienced engineers works closely with customers and leading equipment builders for unique insights into their new technology and lubrication requirements. This gives our research scientists and lubricant formulators the ability to build leading-edge lubricants from the ground up — making them highly effective in the equipment they lubricate, meeting or exceeding customers' stringent demands.

Supported by global builder preferential endorsements and proven field performance.

Thoroughly tested before they are commercialized, Mobil Industrial Lubricants and greases are well supported by extensive equipment builder approvals. They meet global quality standards and are compliant with rigorous internal management systems for manufacturing, customer service, laboratories, safety, health, and environment. Because of this, Mobil Industrial Lubricants are recognized across the industry for consistently delivering reliable performance and maximum equipment protections by leading OEMs.
