

**Help improve energy efficiency, reduce
unscheduled downtime, and lower maintenance costs.
With Mobil Industrial Lubricants.**

As an operator of hydraulic-powered marine machinery, you know how important a role keeping your machinery running efficiently plays in your productivity. And you are probably familiar with the standard-setting Mobil DTE 20 and Mobil DTE 10M hydraulic oils, known for their long life and system keep-clean performance. Now we've even surpassed them.

Introducing Mobil DTE 10 Excel Series — the next generation of hydraulic oils.

New Mobil DTE 10 Excel offers exceptional long life and efficient hydraulic lubrication. In controlled field testing against standard fluids, up to 6 percent improvement in hydraulic efficiency was measured, which may lead to substantial reductions in energy consumption.* In addition to potential efficiency savings, Mobil DTE 10 Excel offers ultra keep-clean performance and durability in some of the harshest conditions — helping hydraulic system components perform as they were designed to and lasting up to 3 times longer than competitive oils.

More than advanced-technology lubricants — partnering with you to help make productivity fly. When you rely on us, you're never on your own. Because we don't just sell products. We work with you to ensure you have the proper support you need. Including a comprehensive range of analytic support programs executed globally by trained sales representatives and engineers — all to help lower your total cost of operation.

So lift your marine machinery to greater heights with Mobil Industrial Lubricants. After all, why settle for a vessel that floats, when you can have one that flies?

*Results may vary depending on operating conditions.

With Mobil Industrial Lubricants and technical assistance from trained sales representatives and engineers, you can help ensure your machinery works effectively and productivity keeps moving — helping you stay more competitive.

For more information on all Mobil Industrial Lubricants and services, call your local company representative or the ExxonMobil technical help line at XXX-XXX-XXXX. Also visit www.mobilindustrial.com.
